Road trips used to be stressful. Cruise control only managed speed, but not distance or safety. Now, with Distance pacing cruise control with traffic stop-go, simply set your desired speed and let sensor technology maintain a safe distance between you and the vehicle ahead. It's stop/go feature automatically brings the vehicle to a stop if traffic stops and resumes distance pacing cruise when traffic starts to move again. Distance pacing cruise control with traffic stop-go; your ultimate co-pilot.Safety and Security Forward collision mitigation - Forward thinking. You look away for just a second and suddenly the vehicle in front of you has stopped. That's when the forward collision mitigation system comes to life. When it senses an impending impact, it will activate a combination of features to help prevent or reduce the severity of an accident. Forward collision mitigation is always looking ahead. Pedestrian impact prevention - An extra step toward safety. Pedestrians don't always stop, look, and listen, but with Pedestrian Impact Prevention, your vehicle is equipped to better see them and avoid them. This system constantly monitors the road ahead to identify and track pedestrians. It projects that image to an interior display screen, AND should an impact become likely, Pedestrian impact prevention takes steps to avoid a collision. Rear camera - Watching your back! The rear camera helps you see obstacles and hazards you otherwise couldn't by showing enhanced images of what is behind you. The rear camera is an extra set of eyes that's both convenient and safe. Lane departure prevention - Keep it between the lines. It only takes a moment of inattention for your vehicle to drift. With lane departure prevention, your vehicle takes corrective action to help you avoid unintentionally moving out of your lane. Lane departure prevention is an extra level of safety for you and those around you.nn nnTo be sure you don't miss out, give us a call at 207-922-2277 and schedule a test drive.
