Convenience Distance pacing cruise control with traffic stop-go. Set it and forget it. Road trips used to be stressful. Cruise control only managed speed, but not distance or safety. Now, with Distance pacing cruise control with traffic stop-go, simply set your desired speed and let sensor technology maintain a safe distance between you and the vehicle ahead. It's stop/go feature automatically brings the vehicle to a stop if traffic stops and resumes distance pacing cruise when traffic starts to move again. Distance pacing cruise control with traffic stop-go; your ultimate co-pilot.
Safety and Security Hands-on cruise control. Set it and forget it. Road trips used to be stressful. Cruise control only managed speed, but not distance or safety. Now, with hands-on cruise control, simply set your desired speed and let sensor technology maintain a safe distance between you and surrounding vehicles. It slows you down; speeds you up and even keeps you in your own lane. Meet your ultimate co-pilot with hands-on cruise control. Pedestrian impact prevention - An extra step toward safety. Pedestrians don't always stop, look, and listen, but with Pedestrian Impact Prevention, your vehicle is equipped to better see them and avoid them. This system constantly monitors the road ahead to identify and track pedestrians. It projects that image to an interior display screen, AND should an impact become likely, Pedestrian impact prevention takes steps to avoid a collision. Brake assist - Stop right there. Something jumps out into the middle of the road and you need to stop now! With brake assist, you will. It uses the speed of the brake pedal's travel to sense panic braking, then applies all available power to boost your stopping power. Brake assist can stop the accident before it is one.
