Set it and forget it. Road trips used to be stressful, until cruise control set the pace. Simply set the desired speed using the steering wheel mounted controls and it will maintain that speed without driver intervention. This can help minimize driver fatigue and improve overall fuel economy. Resting your right foot is right at your fingertips thanks to cruise control with steering wheel mounted controls. Power open and close liftgate - On-demand access. When your arms are full of cargo, the last thing you want to do is set it all down just to open the liftgate, then pick it all back up to load it in. By remotely opening and closing, power liftgate lets you skip straight to the loading. It also eliminates the awkward stretch to reach up for the liftgate to close it. Load and go with power open and close liftgate.Safety and Security Rear camera - Watching your back! The rear camera helps you see obstacles and hazards you otherwise couldn't by showing enhanced images of what is behind you. The rear camera is an extra set of eyes that's both convenient and safe. Brake assist - Stop right there. Something jumps out into the middle of the road and you need to stop now! With brake assist, you will. It uses the speed of the brake pedal's travel to sense panic braking, then applies all available power to boost your stopping power. Brake assist can stop the accident before it is one.Technology and Telematics Selective Internet access - a more focused delivery. Selective internet access allows you to tailor the features for your feed, such as sports scores, local news, or current weather. When it comes to getting what you want, selective internet access is a net gain.nnnn * While every reasonable effort is made to ensure the accuracy of this information, we are not responsible for any errors or omissions contained on these pages.
