DESCRIPTION/OPTIONS: Thank you for choosing Crafts Cars, this Twilight Blue Metallic 2017 Subaru Legacy Limited is a great choice! Check out the following:nnnn nnnnEyesight and Navigation System and High Beam Assist (\$1,995 value)Reverse Auto BrakeEyeSight System with Lane Keep AssistHID HeadlightsHigh Beam AssistSubaru Starlink 7.0 Multimedia Navigation System RadioEyeSight System with Lane Keep AssistAdaptive Cruise ControlLane Departure WarningPre-Collision SystemmnnEYESIGHT & NAVIGATION SYSTEM & HIGH BEAM ASSIST, WARM IVORY, PERFORATED LEATHER-TRIMMED UPHOLSTERYnnnnConvenience Distance pacing cruise control - Set it and forget it. Road trips used to be stressful. Cruise control only managed speed, but not distance or safety. Now, with Distance pacing cruise control, simply set your desired speed and let sensor technology maintain a safe distance between you and the vehicle ahead. Distance pacing cruise control; your ultimate co-pilot.Safety and Security Forward collision mitigation - Forward thinking. You look away for just a second and suddenly the vehicle in front of you has stopped. That's when the forward collision mitigation system comes to life. When it senses an impending impact, it will activate a combination of features to help prevent or reduce the severity of an accident. Forward collision mitigation is always looking ahead. Rear camera - Watching your back! The rear camera helps you see obstacles and hazards you otherwise couldn't by showing enhanced images of what is behind you. The rear camera is an extra set of eyes that's both convenient and safe. Rear collision mitigation - It has your back. Rear collision mitigation uses sensors to monitor the area behind you. If it senses an impending crash, it activates certain features to help prevent a collision or reduce the severity of it. Put your worries behind you with rear collision mitigation. Brake assist - Stop right there. Something jumps out into the middle of the road and you need to stop now! With brake assist, you will. It uses the speed of the brake pedal's travel to sense panic braking, then applies all available power to boost your stopping power. Brake assist can stop the accident before it is one.nnnn * While every reasonable effort is made to ensure the accuracy of this information, we are not responsible for any errors or omissions contained on these pages.
